# PSYCHOLOGICAL FRAMEWORK

## STAGE TWO: Preoperational Stage

- Ages 2-6
- Language development is very important
- Egocentrism!  
Only understand their own point of view
- Conservation-cannot understand the concept of numbers, length, mass, weight, volume and quantity)

# METHODOLOGICAL FRAMEWORK

This model defines learning as a process in which experience always gets deeper and deeper.

Knowledge is the result of the combination of two activities which are in dialectic relationship:

1. grasping experience
2. rielaborating experience.

# METHODOLOGICAL FRAMEWORK
